

My Lenovo y50 AC charger problems!!!!

Posted by lenovoadmin - 06 Jan 2017 06:37

Hi,

I would suggest to stop using that AC adapter with your laptop because it may cause more damage in the long run. If you have another AC adapter that has the same voltage do try it first with your laptop and see if the same problem will persist because if it won't that means you just need to replace the original AC adapter with a new one.
