My lenovo laptop, Why am Posted by lenovoadmin - 06 Jan 2017 09:01	I getting "fan	n error"? Will not boot up.
--------------------------------------------------------------------	----------------	-----------------------------

Lenovo Thinkpad T430 fan error will not boot up, This error could be because the computers CPU fan plug/wires pinched/damaged/loose connection, fan is dirty/ faulty or problem with fan sensor on motherboard. Hope this helps, good luck.
