| How to fix fan error n Lenovo ThinkPad T410 Posted by lenovoadmin - 06 Jan 2017 09:15 |
|---|
| No need to take laptop apart .  |
| Simply blow air from you're mouth into the left side where the fan exhaust is.        |
| Could hear the fan moving and dust came out of laptop.                                |
| Just blow very hard into it, worked for me.   |
