

In my lenovo Installing Windows 7 64 bit but no imaging devices there for webcam

Posted by lenovoadmin - 06 Jan 2017 10:40

Hi there,

As I understand that you are facing issue with Camera not working after installing Windows 7

So please follow the following:

>Update USB3.0 driver

>Then you'll see the Imaging device (Lenovo Easy Camera) installation process will be going in the Windows notification area.

>Once it is done restart & then tries to install Lenovo Camera driver.

For more info you can go through this link which is made available by Lenovo

I hope the above information helps.
