

My Lenovo G50-80 factory reset issues ..

Posted by lenovoadmin - 06 Jan 2017 11:18

I found an answer that seems to be working for me. I'm currently at 12% restoring factory settings. Check out the instructions here:

forums.lenovo.com/t5/Lenovo-Beacon-Stick...d-drive/ta-p/1317485

After running these instructions, the novo button still doesn't work. Neither does starting the Lenovo OneKey app. I had to restart the factory settings using the windows restore utilities. Before having run these instructions, the third option of restoring from the factory supplied partition wasn't available. This time it was and the restoration is proceeding.

If I don't come back and say otherwise, assume success!
